- Compatible with mobile devices using 900 & 1800 MHz frequencies

zBoost YX520-i For 900 and 1800 MHz

About zBoost By Wi-Ex

zBoost®, by Wi-Ex®, the leading provider of consumer cell phone signal boosters, enhances the signal performance of your:

- Cell Phone
- Smart Phone, such as, iPhone, Blackberry and PDA
- Wireless Broadband Device

zBoost® not only increases signal for voice transmission, it also increases signal and speed of aircards.

zBoost® provides solutions for the 70% of cell phone owners experiencing problems with their cell phone service, including dropped calls, poor signal reception or dead zones.

There are several obstacles that can contribute to the poor reception you receive indoors:

- Location of the cell phone tower in relation to you
- Obstructions caused by buildings, terrain and trees

zBoost® improves indoor cell phone signal by capturing and enhancing outside signal, then bringing it indoors.
